- # Mezzanine Flooring System.
- # Cantilever Racking System.

We look forward to building a healthy business relationship with you.

PATENTED Two Directional Design Arrangements : Our Speciality

We have pioneered the launch of locking of load beams to Upright in two different planes (x and y axis) in India. This designs ensures stability, strength and safety; while providing simplicity of operations and it is proven by zero defect performance for past 25 years. Our two directional locking has been widely appreciated by all users.

Salient features of "Unique Racks"

We follow IS standard 800/801 for structural design of all sections (rack members) and FEM standard as operating standards. Our section designing is also approved by BUREAU VERITAS

- ◆ Raw material - steel grade FE410 / ST-34 - DD quality suitable for roll forming, conventional forming, punching, Make - Jindal/Tata/Uttam
- ◆ Racks are designed at 1.75 Safety factor against minimum required as 1.55, hence our sections might be slightly over designed if compared with others. However we ensure the better life of products supplied by us despite of rough handling culture.

Have received repeat orders from all our clients.
" ONCE A CLIENT, ALWAYS A CLIENT"
